Company Profile

iAremyhair, under JPG Enterprise Pte Ltd, is the only hair centre in Singapore under the CareTrust certification. The company provides treatment for thinning or damaged hair and specializes in the best quality Non-Surgical Hair Replacement Systems.

Keen To Stop Hair Loss?

> Low Level Laser Therapy

For Those With Receding Hairline

100 Volunteers Wanted

A drug-free alternative for natural hair growth and restoration

LLLT has been shown to stimulate cellular metabolism while dramatically increasing blood supply to targeted areas. This blood supply is necessary to heal or restore damaged hair follicle cells.

iAremyhair, the frontrunner in the field of hair technology, is conducting its own Low Level Laser Therapy (LLLT) study based on 100 volunteers over a 6-month program.

Participants in the LLLT study will receive free treatment and hair care products. Results and findings will be posted on www.aremhair.com.

TOPPIK

> The 30-second "Hair Transplant"!

For Those With Minor Hair Loss

What is Toppik?

It is one of the most advanced hair "growth" products that produces remarkable and visible results in 30 seconds!

How to use?

Toppik is applied simply by shaking its bottle gently over the thinning hair area. Within a matter of seconds, thousands of tiny hair fibres will intertwine with the real hair, bonding so securely that the effect lasts through even the strongest wind and hardest rain.

Safe & Effective

Toppik can be easily removed using any shampoo. It is extremely safe and works compatibly with hair transplants, so much so that it is highly recommended by doctors themselves.
